eural supersilk

Product Data

Eural is a range of high quality natural white 100% recycled papers, manufactured at the Papeteries du Bourray Mill in Le Mans, France. Eural is manufactured using de-inked post-consumer and post-industrial waste (the de-inked pulp is produced on site) without any bleaching processes.

Eural Supersilk offers outstanding qualities including excellent opacity, a smooth finish and great printability.

Naturally, Eural's services live up to your expectations.

- Eural Supersilk is a 100% recycled silk coated paper with a natural whiteness
- Eural Supersilk is available in the following weights: 80, 90, 100, 115, 130, 150 and 170 gsm.
